

SENIOR DIRECTOR OF WATER RESOURCES PLANNING

Eastern Municipal Water District

(Perris, CA)

THE DISTRICT

Located in western Riverside County, California, the Eastern Municipal Water District (EMWD) provides safe and reliable water and wastewater management services to a population of nearly 815,000 people in a 555 square mile service area. The District's main office is located in Perris, California with key operational facilities located along the 215 highway corridor from Moreno Valley to Temecula. Operations extend eastward to Hemet and San Jacinto.

The District was organized as a Municipal Water District in 1950 for the primary purpose of importing Colorado River water to its service area, thereby augmenting local water supplies. The District began providing wastewater treatment services to customers within its service area in 1962 and, as a result, has become actively involved in the production of recycled water. EMWD is governed by a five member Board of Directors and conducts its business with the support of a highly trained workforce of approximately 610 employees. The District's FY 2018-19 operating budget is \$402.8 million, of which \$240.2 million are for operating revenue. The District's services include water supply, water storage, sewer and water recycling.

EMWD was recently honored with the prestigious J.D. Power and Associates award for the 2018 Water Utility Residential Customer Satisfaction Survey. The study is in its third year and measures satisfaction of residential customers of utilities delivering water to at least 400,000 people. Satisfaction is gauged by measuring 33 attributes within six factors: delivery, price, conservation, billing and payment, communications, and customer service. EMWD ranked highest in customer satisfaction in the western region, which consisted of 12 states. EMWD was also recognized as highest in customer satisfaction among all participating agencies for its customer communications efforts.
